

DR. JOHN E. SHERMAN

WHAT MADE YOU SPECIALIZE IN PLASTIC SURGERY

Plastic Surgery has the excitement of surgery, and the satisfaction of blending aesthetics with form and function **FAVORITE PART OF YOUR JOB**

Seeing patients at their first postoperative visit. It is always a thrill when you take off the bandages **ATTRIBUTES THAT MAKE A DOCTOR SUCCESSFUL**

Communication, a sense of aesthetics and integrity **ALTERNATIVE OCCUPATION** Architect or history teacher **HOBBIES** Golf, squash, photography **PLACE YOU GO TO ESCAPE THE OFFICE** Across the street to the Metropolitan Museum of Art **FRAMED PHOTOS ON YOUR DESK** My wife and children—about 20 photos in all, a Bert Stern photo of Marilyn Monroe

AN EXPERIENCED APPROACH

Dr. Sherman has integrated the newest techniques in **FACIAL REJUVENATION AND BODY CONTOURING** into his practice with safety and predictability of results. “The evolution of a plastic surgeon’s techniques and practice change dramatically after 10, 15 and 20 years,” says Dr. Sherman. “Experience often helps the surgeon feel comfortable introducing new techniques into his or her practice, which ultimately benefits the patient,” he says. The doctor uses **ULTRASOUND** and **POWER ASSISTED LIPOSUCTION** to help achieve the best result possible. “Good liposuction results may still be obtained without these newer techniques, however it simply increases the index of patient satisfaction and safety and reduces the need for further touchups,” he says. Dr. Sherman serves on the National Education Faculty (NEF) for both Botox and Restylane, which was instrumental in helping to introduce Restylane to the United States market.

a caring approach

Manhattan plastic surgeon John E. Sherman has spent a career healing lives. On 9/11, as one of the first doctors to respond to the World Trade Center collapse, he risked his life attempting to set up a triage center, and got buried in ash and debris.

BOARD CERTIFICATION

American Board of Plastic Surgery

MEDICAL DEGREE

New York Medical College

PLASTIC SURGERY RESIDENCY

Montefiore Hospital Medical Center,
The New York Hospital and Cornell
Medical Center

Body Contouring
Breast Augmentation
Facial Rejuvenation
Liposuction
Restylane™ and Botox®

LOCATION

New York, New York

“You don’t have to
be a VIP to be
well taken care of.”

—JOHN E. SHERMAN, MD, FACS

This concern for others typifies Dr. Sherman’s practice, where the patient is always treated like family. “We run the practice like an old-time practice,” Dr. Sherman says. “You don’t have to be a VIP to be well taken care of.” It shows in the details. After surgery his nurses stay overnight with patients. The doctor returns all phone calls, no matter if it’s nighttime or a weekend. Dr. Sherman has been performing liposuction surgery for 25 years. A clinical assistant professor of surgery at Cornell University Medical College, he also performs cosmetic surgery of the face and breast, as well as skin enhancement. “We have a beautiful 2,000-square-foot, in-office surgical facility where every measure has been taken to ensure comfort and safety,” he adds.

Located across the street from the Metropolitan Museum of Art, Dr. Sherman’s office boasts the original George Hurrell black-and-white movie star photos from the 1940s, lending an air of elegance and sophistication. Leather chairs and light woodwork make the space even more inviting. The educated staff creates a welcoming friendliness. “A patient’s experience is based on the sum total of the doctor and his or her staff,” Dr. Sherman says. “We always offer a team approach to give the best care to the patient.” 212-535-2300 or newbeauty.com/sherman.
